

Dr. Barone is Director of Surgical Oncology Services at Sharp Healthcare and Voluntary Professor of Surgery at UCSD School of Medicine. He also is principal investigator on many clinical research studies.

Dr. Barone is a founding member of Oncology Associates of San Diego and Comprehensive Breast Care Center of San Diego. He entered private practice after being chief of surgical oncology at The VA Medical Center in San Diego and faculty member at the University of California San Diego School of Medicine where he helped develop the division of Surgical Oncology.

Dr. Barone is recognized for developing the hepatic infusion pump for the delivery of chemotherapy directly in to the liver and the Port-a-Cath implantable port for the delivery of chemotherapeutic drugs intravenously, intraarterially, and intraperitoneally. He also has been one of the first surgeons in the country to treat extensive cancers of the abdomen originating from the gastrointestinal tract and ovary with cytoreductive surgery and heated intraperitoneal chemotherapy.

Dr. Barone received his medical degree from SUNY Buffalo. He completed his general surgery residency and surgical oncology fellowship at the University of Illinois Hospitals in Chicago, Illinois.

He is fellow of the American College of Surgeons, the Society of Surgical Oncology, The American Society of Clinical Oncology and Society for Surgery of the Alimentary Tract.

Dr. Barone's hobbies are golf, skiing, and fly fishing.
